Node.js

Summary

About

I am Philasande Bhani, a young graduate of 27 years, in hand, I have a National Diploma in Information Technology and a determination to be one of the best in the field, For the past two years, I worked as an intern for a software development firm where I have gained valuable insight on how a successful company operates.

I have the skills and training needed to help develop and maintain software programs and to make improvements that will enhance functionality. I have outstanding problem skills with the ability to work with technical and abstract concepts efficiently. I also have extensive knowledge of JavaScript, Java, Spring and Hibernate Framework, Python 3, HTML5 with CSS3 and JavaScript Angular 4+ with TypeScript, Spring Boot, React and React Native, Other Software Development Methodologies, Software Development Tools, Containerization, DevOps foundation.

I have excellent communication skills with the ability to work directly with clients to provide outstanding customer service. After talking with the clients, I can determine ways to improve performance, speed, and usability and then relay this information to programmers. I have also acquired the ability to troubleshoot technical issues to find the cause and to implement a solution to problems as they arise.

I have the skills to explain the functionality and other technical issues to other professionals and non-technical users. I pay close attention to details, and I can stay focused on the task at hand for long periods to get the job done. I am updated on all the latest changes that take place in the industry.

Ideal next job

I would like to assist the development team with all aspects of software design and coding. I would like my primary role to be learning the codebase, attending design meetings, writing basic code, fixing bugs, and assisting the Development Manager in all design-related tasks.

I am most proficient in using Java and Spring Boot as a framework, React.js Vue.js, Angular.js Android and I would like to work with Microsoft Azure to manage my projects. I am looking for a company that will aid in my development and support my career growth.

Please note that my notice period is 4 weeks.

- Designing and implementing Java-based applications for the backend.
- Utilizing front-end technologies such as React, React Native, and Veu.js and Android to develop user interfaces.
- Analyzing user requirements to inform the design and development process.
- Defining clear application objectives that align with clients' specific goals.
- Writing clean and efficient code to ensure high-quality software solutions.
- Conducting rigorous testing procedures to identify and address bugs and issues.
- Providing technical support for clients to resolve challenges and issues with their existing systems.
- Offering ongoing support to maintain the stability and functionality of systems.
- Fostering strong client relationships and satisfaction through excellent support and service.

Riverside (Java Developer)

React Native Java JavaScript HTML5 CSS3 Spring Boot Spring MVC Spring Framework

Hibernate MySQL MongoDB Git Azure Slack Angular TypeScript Bootstrap

As a Java Developer, I am responsible for designing and implementing Java-based applications that meet the needs of the organization and its clients. To achieve this, I analyze user requirements to inform application design, define application objectives and functionality, and align application design with business goals.

My key duties include developing and testing software to ensure that it meets quality standards and is free of errors or defects. Throughout the development process, I collaborate with other team members, such as software engineers and quality assurance testers, to ensure that the application meets client expectations and industry standards.

In addition to developing new software, I also support clients with existing systems. This involves identifying and resolving issues and bugs in the software and ensuring that the system is up-to-date and functioning correctly.

Overall, as a Java Developer, I am committed to producing high-quality, efficient, and reliable software that meets the needs of the organization and its clients while also aligning with business goals.

Riverside (Java Developer Trainee)

Java Spring Boot Angular JavaScript HTML CSS3 Python MongoDB MySQL jQuery

TypeScript CSS

I successfully completed a comprehensive 12-month blended-learning program at Geeks4Learning, which provided me with both theoretical and practical training in industry-relevant skills. Throughout the program, I had the opportunity to utilize internationally recognized proficiency assessment tools.

The program covered a wide range of topics, including soft skills and workplace skills like verbal and non-verbal communication, work ethics, HR processes, and teamwork. Additionally, I gained expertise in MICT Seta accredited training material for NQF 5 Systems Development.

Geeks4Learning also offered industry-relevant courses that were aligned with Microsoft, such as Advanced Programming Concepts and Front-End Development. These courses were listed in the above technology stack.

As a part of the program, I participated in a project-simulation based on a real-life problem statement. This practical exercise allowed me to apply my theoretical understanding of the relevant tools and technologies to simulate a real-world project successfully.

Jan 2021 - Dec 2021

MLab (Code Tribe) (Front-End Developer Trainee)

React React Native JavaScript HTML5 CSS3

I successfully completed a 12-month rigorous blended-learning program at MLab (Code Tribe), where I received comprehensive theoretical and practical training in industry-relevant skills. Throughout the program, I had the opportunity to use internationally recognized proficiency assessment tools, ensuring I received a high-quality education.

The program covered several important topics that are critical for success in industry. These include developing project concepts and maintaining optimal workflow, completing detailed programming and development tasks for both public and internal websites, and carrying out quality assurance tests to identify errors and optimize usability.

During the program, I gained valuable experience in managing projects from conception to completion, including developing project plans and executing them effectively. I also learned advanced programming and development techniques and applied them to create high-quality websites that meet industry standards. Additionally, I learned how to carry out rigorous quality assurance testing to identify errors and make necessary adjustments.

Overall, the program at MLab (Code Tribe) has equipped me with the necessary skills and expertise to succeed in the industry, and I am confident that I can apply these skills effectively to any future projects or roles.
